June - 2023 Cleared

Intermediate BISEK

July - 2023 Present

Course

Institute Jawan Pakistan

Web And Mobile App Development

Feb - 2023 to Nov 2023

PROFILE

Motivated full-stack developer with a strong grasp of web and mobile technologies. Currently in Class 12, I've built and managed several complex projects, including eCommerce platforms and real-time chat applications. Skilled in both frontend and backend development, I am eager to apply my hands-on experience and problem-solving abilities in a dynamic environment.

WORK EXPERIENCE

Full Stack Developer - Freelance

Feb - 2023 – Present

- **OLX-like eCommerce Application**
- **Description:** Developed a fully functional eCommerce application inspired by OLX. Managed both front-end and back-end development, including user authentication, product listings, and image uploads using Cloudinary.
- **Technologies:** React.js, Node.js, Express.js, Redux Toolkit, MongoDB, Cloudinary.
- **YouTube-like Video Platform**
- **Description:** Implemented backend features for a YouTube-like platform, including user authentication, subscriptions, likes, comments, and video management. Focused on building scalable and efficient APIs.
- **Technologies:** Node.js, Express.js, MongoDB, JWT, Multer.
- **Chat Application**
- **Description:** Created a real-time chat application using React Native and Socket.io. Managed both front-end and back-end development, including user authentication and real-time message handling.
- **Technologies:** React Native, Express.js, Socket.io, MongoDB.
